1st January-15 to 31-March-15

ICISM-Exploring opportunities.

I.C.I.S.M. 2015 will provide the necessary impetus to set the pace for all of us! A handy tool at our disposal is the tried, tested and effective Methodology of Quality Circles that emphasizes people participation for continuous evolution of processes and systems to achieve higher productivity. What Japan, and other countries have already done, to strengthen themselves through Quality Movements, it's time for us in the Indian Steel Industry and associated Businesses to bolster our existence in the business through a series of incessant and focused efforts in the similar direction! The presence of Industry stalwarts makes this event even more significant as it shows the commitment of our leaders towards Quality Consciousness. This event shall prove to be an important effort in synchronizing the needs of Technology Users and Suppliers
